These channels and platforms have shown strong performance in converting impressions to sales, and allocating more budget to them will likely yield even higher returns.

- **Focus on High-ROI Audience Segments**: Audience 5 (6.3x ROI) and Audience 1 (6.0x ROI) are top performers, delivering the highest ROI. Refining targeting strategies for these segments and tailoring content to their specific needs can further boost engagement and drive higher conversion rates.

- **Optimize Daypart & Time-of-Day Performance**: Analyzing ad performance across various dayparts is crucial for identifying the most effective time slots. E-COMMERCE VS. RETAIL PERFORMANCE

- **E-commerce Outperforms Retail in Sales & Impressions**: E-commerce has consistently shown superior performance in both sales and impressions over the years. This indicates that online platforms are generating more traction, reaching a broader audience, and yielding higher conversions compared to retail.
- **Higher ROI for E-commerce**: The ROI for E-commerce reached 6.2x by 2022, outperforming Retail across each year. This suggests that E-commerce channels are more efficient in converting impressions into sales, making them a more profitable investment for future campaigns.
- **Retail Lags Behind E-commerce in ROI**: Retail, while still contributing to overall sales, consistently shows lower ROI compared to E-commerce. This indicates that the return on investment in retail channels is not as efficient, and efforts may be better spent optimizing E-commerce strategies.
- **Focus on Scaling E-commerce Efforts**: Given the outperformance of E-commerce, future campaigns should prioritize scaling online efforts. The increasing shift toward online shopping presents significant opportunities to refine targeting, improve customer engagement, and drive even higher returns within the E-commerce space.

Strategic
Recommendations

KEY RECOMMENDATION

Prioritize High-ROI Channels and Platforms :

Focus future campaign budgets on top-performing channels like Channel 7, Channel 8, and Platform 1, which consistently show high ROI (above 6x). These channels have proven to convert impressions into sales most efficiently. A larger allocation to these channels will likely lead to even greater returns and optimized resource allocation.

Leverage E-commerce for Maximum Growth:

E-commerce has consistently outperformed retail in both sales and ROI. Future strategies should heavily focus on scaling E-commerce efforts, refining targeting, and optimizing creatives for online platforms. Capitalizing on the growing trend of online shopping will allow for better returns on investment and increased market penetration.

Optimize Underperforming Segments and Channels:

Channels and platforms with lower ROI (e.g., Channel 6 and Platform 2) should be closely analyzed and optimized. This could involve refining audience targeting, improving creative strategies, and adjusting messaging to increase conversion rates. Additionally, adjusting daypart strategies to target high-performing times will further enhance overall campaign performance.
